```
/Users          /Interface          /Program          /Files

    Press Pause button
  ────────────────────►
                         Sending request
                       ──────────────────────────►
                                              ┌──────────┐
                                              │ wait job file
                                              │ queue end
                                              ◄──────────┘

                                                Add state logs
                                              ──────────────────►

                                                Add job logs
                                              ──────────────────►

                                             Update Save job settings
                                              ──────────────────►
                          Sending request
                       ◄──────────────────────────
                       send pending notification
                       ◄──────────────────────────
```

In this case there is job(s) currently running.
Means that cancel and pause
button are displayed
